ANATOMICAL PRELECTIONS, the eighth Course.  
ON Monday November the Ninth, the introductory Lecture will be read at five in the Evening; wherein a Sketch of the original Authors and improvers of Anatomy will be given.

On Wednesday following, the Osteology will begin, and on Friday and following Days proceed until the Sum of the Discoveries of *Havers*, *Nesbit* and *Ruschius*, in the Conformation of these Parts, are perfectly described; and the Doctrines of the Diseases of the Bones, as suggested by the celebrated *Boerhaave* in his Aphorisms, and explained by the Baron Van Suietan, are illustrated, with fine Preparations of their Membranes and Vessels.

In the Second Part, the Muscling, the elegant Descriptions of that great Anatomist *William Cooper*, will be illustrated, and many Preparations exhibited, whereby the multitude of Vessels, in these Instruments of Motion are set to View; and the peculiar modification of component Parts, by which they are liable to Obstructions, cold and inflammation, may be clearly understood.

In the Third Part, the Trunks and larger Branches of the Arteries will be traced through all the Organs, and the Motion of the Blood through them, and return by the Veins, as proposed, and proved by *Hervey*, will be likewise demonstrated by the additional Experiments of Injections, which run with great Facility from Arteries into Veins, quite round from the left Ventricle to the right Auricle and Lungs.

In Part the Fourth, all the Nerves, as usual, will be traced as far as can be by Anatomical Enchyresis, and shewn; where the proximate Causes of some Palsies, and imbecility of sensitive Powers are made evident to Sight.

Part the Fifth exhibits the Viscera of the three Cavities, wherein not only the Structure and circular Motion of the Fluids will be again demonstrated, but some of the Causes whereby that Motion, on which animal Life chiefly depends, is so frequently disturbed. And in this Part the Discoveries of the famous *Willis* in the Structure of the Encephalon and Nerves; of *Lower* in the Heart, and of *Giffon* in the Constriction, and Motions of the Liver, Stomach and Intestines, will be shewn, and such Inferences and Deductions drawn from the Structure, as may seem to set the Doctrines on the Uses and Affections of these Parts, in the clearest Light, as delivered by those great Men.

The whole Course too, will be closed with the beautiful Phenomenon of the Blood's Circulation, as well in the double reflecting as in the solar Microscope.

Private Instruction, Ten-Pounds.

Public Lectures, Five Pounds.

N. B. And as the President and Governors insist, that a public Examination in natural Philosophy shall precede the medical Degrees, a Course of Prelections will be instituted for this Intention; and all those Parts of natural Philosophy selected, which are deemed essentially necessary to the right understanding of Principles on which the Propositions concerning the animal Oeconomy are founded.

Price £. 3 : 5.

No Admittance until each Course is paid for, King's College, Oct. 15, 1772.

BRESLAW (in Germany) July 24.  
CAMP is ordered at Reiss, consisting of Prussian and Austrian troops, where the Emperor of Germany and the King of Prussia are to have a conference in the beginning of September next.

The affair between the Russian and Austrian troops at Lemberg, puzzles all our Politicians: The Russian garrison there, is about 3000 men strong, and the Austrian insist that the Russians shall leave that city, if not they will take it by force; but the Russians insist not to quit it, and are ready for defence.

Paris, August 17. Our ships from the Isle of France having brought intelligence that the hurricane which ruined that Colony the end of February last, had also destroyed the ships which were cruising near the Isles of Bourbon, Madagascar, &c. our Ministry have given orders to fit out immediately five ships of war to depart for that station.

Copenhagen, August 18. By advices from Helsingbourg, in Sweden, we are informed, that the garrison of Christianstadt had revolted a few Days before; that they had prevailed on the inhabitants of that Town to join them; and that they had renounced all obedience to the different orders of the state. Prince Charles, the King of Sweden's brother, is in Scania, where he has assembled and put himself at the head of 4000 men, with whom he is marched towards Christianstadt.

LONDON, August 12.

Lord Chatham is said to have written to a Great Personage a long letter upon East India affairs, shewing the absolute necessity of taking the territorial affairs of India into the hands of the nation. The letter was submitted to the perusal of the Premier. Lord Camden assisted his Lordship in drawing up the plan, which, it is said, is perfect in its kind.

St. James's, Aug. 12. The King has been pleased to grant unto the Right Hon. Wills Hill, Earl of Hillsborough, in Ireland, and Lord Harwich, Baron of Harwich, in Essex, and to his issue male, the Dignities of Viscount and Earl of Great Britain, by the Titles of Viscount Fairford, and Earl of Hillsborough, in the county of Gloucester.

August 14. On Wednesday the Earl of Hillsborough kissed his Majesty's hand on being created an Earl of Great Britain.

Orders are already issued out for all the Colony Agents to attend the new Secretary for American Affairs the next Board day, which is fixed for Tuesday the 18th inst.

We learn from Vienna, that General Esterhazy has marched into Poland with an Army of 24,000 men, to join General Haddik.

It is now said that Lord Hillsborough is to go to Ireland, as Lord Lieutenant, before the next Session of Parliament in that Kingdom, and that Lord Stormont is to continue Ambassador at the Court of Vienna, and Lord Harcourt at Paris.

It is circulated in the city, that two Gentlemen particularly conversant in East India affairs, have been invited to Petersburg upon very advantageous terms, to undertake the management of the trade to the Oriental Quarter, which is to be established and carried on under the immediate auspices of the Emperess.

Aug. 17. It is thought, by several persons well acquainted with Administration that the result of the proceedings of the Secret Committee on East-India affairs will terminate in the Government's taking the management of our Asiatic matters into their own hands. This the Directors cannot possibly have any objection to, as it will save them an infinity of trouble, and ease them of the fatigue of negotiating State Affairs from the Cabinet in Leadenhall-street.

Aug. 19. Important dispatches, said to contain matters of a very singular nature, were on Sunday received at the Secretary of State's Office, in Cleveland row, from their High Mightinesses the States General.

Wagers are laid at the West end of the town that a newly appointed Secretary of State will not remain in office till the meeting of Parliament.

Extract of a letter from Hamburg, Aug. 25.

"The day before yesterday two express were dispatched from Stockholm, and passed through this city, one in the forenoon, the other in the evening; in their way through our city they left several letters behind them; one of them is said to be dispatched for France, the other for England; each of them left a letter at the Minister Monsieur Houze's; but it is no longer a secret here. The following is the intelligence they brought: 'The four great cities, namely, Christianstadt, Jönköping, Landserona, and Gothenburgh, have declared his Majesty the King of Sweden as their absolute Sovereign. On the 13th of this month, Prince Charles, who was then at Schonen, immediately put himself at the head of the troops and the militia of Landserona, and Prince Frederick Adolphus did the same at Gothenburgh. These two Princes joined together, with an army of about 10,000 men, and marched before the walls of Stockholm; in their march they declared every where the King to be absolute; and on their arrival at Stockholm, they demanded their princely rights, which have been limited and oppressed by the present deputation to recall the late act, called the Assurance of the King, in which his Majesty is limited, in a manner not to be suffered by an anointed King.'—The private letters received from thence, since that date, differ only in one article; some say, that his Majesty immediately left Stockholm, and retired to Jönköping to join his troops there, in order to force the States to discharge him of his oath of coronation; but others say, that his Majesty kept himself very snug at Stockholm till the army came before the walls, then he communicated his design to the States; and after a resistance which was made by a great part of the Clergy, and some of the Nobles, they found themselves obliged to discharge his Majesty of his oath, and to declare him an absolute Sovereign. It is remarkable, that no resistance at all was made by the other two States of the Peasants and Burghers. Other letters say, that this important revolution has been published already in a manifesto."

The Spaniards are sending more ships and troops to the coast of Africa, to defend their possessions against the attacks of the Moors; and it is said, that more ships of war will soon sail from hence to the Mediterranean, to defend our trade in that part.

Sept. 3. An evening paper says, "orders are come from the court of Denmark to their agent here, to pay to this Court 60,000*l.* which was the fortune given to Queen Carolina Matilda, and which the court of Denmark have thought proper to return; also 20,000*l.* more, in consideration of the presents made to the Queen on her marriage with the King of Denmark." And it is added, that the above sums of money are to be appropriated for the future maintenance and support of the Queen of Denmark, who, as soon as it is settled, is to come to reside in England."

The following is the substance of the Emperor of Morocco's letter to his Britannick Majesty:

"the bearer of this Imperial letter is Jussuf Jacobson, to Abraham Bendi, a person equally esteemed by his master and his country, and who has your Majesty's interest truly at heart. I have given him general instructions in what manner to act; and from his knowledge of publick affairs, and of his attachment to our mutual interest, I trust your Majesty will give him that degree of credit which his fidelity to me, and inclination to serve you, justly merit. He is particularly acquainted with the reasons and motives which have been the prime reason of the present embassy, relative to your Consul's withdrawing himself from Tetuan, so contrary to the customs and usages established on such occasions. In fine, I have sent him to your Majesty, because I know he has ability, as well as an inclination to serve both you and me."

PHILADELPHIA, October 15.

Extract of a letter from Surinam, Sept. 5th 1772.

"This Colony is in the greatest distress occasioned by an insurrection of the slaves; they are assembled 1000 strong, very formidable, supplied with arms and ammunition, and have defeated our soldiers, and taken some six pounders from them, with which they have fortified themselves on a island, committing great depredations and annoying and terrifying the inhabitants daily. We have made several ineffectual attempts to subdue them, and about 3 months ago they defeated our effort sent against them. I happened to be at a plantation where one of their parties 50 in number came to, and carried off about 80 negroes, and all the guns and ammunition furnished to guard it. We have been obliged to set 3 or 400 of our stoutest negroes free to defend us, and without they do something effectual against them, shall be under the most melancholy apprehensions from these insurgents."

BURLINGTON, October 13.

By an Act of the Legislature of New Jersey, passed at Perth-Amboy the 26th of September last,

there are not to be any more Fairs held in the City of Burlington, Princeton, or Township of Windsor.

MR. HOLT,

Please to insert the following in your next, by which you'll oblige one of your constant Readers.

AS Words are those Channels, by which the Knowledge of Things is conveyed to our Understandings: And upon a right Apprehension of them, depends the Rectitude of our Ideas; so, in order to form our judgments right, they must be used in their true and proper Sense, both in Writing and Speaking: For if the Words of the Writer or Speaker be used in a wrong or improper Sense, they form erroneous Ideas in the Mind, concerning the Thing spoken or written of, causing Confusion in the Hearers or Readers; and too often render the whole unintelligible.

The Reason of my troubling the Printer and Publick with the following Anecdotes and Observations, is the continual improper Use made, in the New England Governments, of the Word, *Improve*; which in our Language, by it's true and etymological Meaning always signifies to *meliorate* or *make better*; but the Inhabitants of that Country almost universally Use the Word in Lieu of *occupy*, *possess*, *tenant*, or *rent*. Instead of more, the following Instances may suffice.—In the Account published in some of the Boston Papers after the late great Fire there, were read of several Houses being burnt, which had been *improved*, (not by Carpenters or Masons, but) by Tailors, Barbers, and Persons of such like Occupations, no ways likely to improve the Tenements in which they resided. In the Times of the Troubles in Boston, when the Manufacturing House was taken Possession of by the Military, we read that the House was *improved* by Mr. Brown. And in the late Account we had of a Man being found in a Chimney in Boston, we are informed that the House was *improved* by Messrs. Homan's and Williams. The perverted Sense of this Word is not only used among those People in common Conversation and the News Papers, but has made it's Way even to the Pulpit. A young Candidate (as I was lately credibly informed) preaching upon the Devices of Satan, said that Satan was permitted (for a certain and limited Time) to *improve* the Tree of Life in the Garden of Eden; but whether he improved the Tree by pruning the luxuriant Branches, manuring the Soil, or by meliorating the Fruit, it seems, he did not inform his Audience.—We sometimes find the same Word used instead of *Employ*: An Instance of which, I remember some Years past; when an ancient Matron, speaking of a skillful Doctor they had in the Town where she lived, said, she had *improved* him upwards of 20 Years. I concluded, however, if the Doctor had had no better Improvements than that old Lady seemed capable of affording, he still stood in need of much greater Improvements to render him a competent Proficient in the medical Art.

My whole End will be answered, Mr. Printer, if you and the other Printers of the publick Papers on this Continent, whenever you take an Article from any Paper where the Verb *improve* or any of it's Derivations are used improperly, will hereafter print them in different Types, that the Learned in the other Parts of his Majesty's Dominions, may see your Disapprobation of so great a Barbarism in the English Language.

NEW-YORK, OCTOBER 22.

The seven Transports mentioned in our last we hear are designed to carry his Majesty's Royal American Regiment, now in this City and the Jerseys, to the Islands of Jamaica and Antigua.

On the Passage Capt. Farquhar spoke with the following Vessels, viz. Sept. the 29th, in Lat. 37, 30, Long. 73, 30, with the Phenix Sloop of War, from Boston for Virginia; the 30th, Lat. 37, 20, Long. 74, with Capt. Davis in a Brig from Riga for Philadelphia, who a few Days before had carried away the Head of his Foremast; and the 4th Instant, in Lat. 38, Lon. 74, with Capt. Cox in a Brig from Lisbon for Philadelphia also.

Wednesday Night the Brig New-York, Captain Walker, arrived here from Honduras Bay, in 52 Days: He sailed from thence in Company with Capt. Devereaux for this Port, and left in the Bay the following Vessels, viz. The Capt. Hunter and Morris, belonging to Glasgow; Capt. Aldrow, Robinson, Gilchrist, Wilson, Finley, and Volans, of Philadelphia; Capt. Van Horne, Fenton, Rose, and Baker, of this Port: On the 2d of Sept. Capt. Walker took off the Coleradoes, the Capt. and Crew of the Sloop Phenix, from the Bay of Honduras for this Place, Vessel and Cargo entirely lost.

The 19th of September, in Lat. 34, 15, Long. 75, Capt. Walker spoke with Capt. Deal, in a Brig from Philadelphia for South-Carolina; and the 23d following he fell in with the Wreck of a Brig, with only the Foremast and Bow-sprit standing, and appeared to have been in that Condition a long Time.

Governor Spry, of Barbadoes, died at that Island the 3d of September.

Last Friday Morning was put on board of a Sloop at the Albany Pier, one Benjamin Collar, who went by the Name of Robinson, and was delivered to the Gaoler of Barrington, in Boston Government, who came in pursuit of him: He was confined in Barrington Gaol, for committing a Rape on his own Daughter, a Child about ten Years old.

He broke Gaol and got as far as Byram in West Chester County, where he was taken and brought back by Patrick Walfh, High Constable, and Elias Anderlof, Marshall, to the Gaol of this City. He confessed the Fact, and said that it was no Crime, nor could they find Law to punish him for it.

TO THE PUBLIC.

I CAN never sufficiently acknowledge those your  
many Favours I have so sensibly received since  
the Establishment of this Office, but hope, from a  
Continuance of that Conduct and Affiduity wherewith  
I have executed the general Business thereof for up-  
wards of Eight Years past, I shall be entitled to  
your future Favour and Protection, assuring you,  
the Summit of my Wish is, to approve myself a  
useful Member of Society, altho' I have lost the Liberty  
of a Britain, in being denied the full Exercise of  
my Profession; a Circumstance I own at one Time  
much affected me, but have since learn'd to palliate  
the Grievance with that ineffable Balsam Con-  
tentment, so truly said to swell a Mite into a Ta-  
lent, and make a Man richer than the Indies. As  
not being concern'd in the Practice, I can have no  
View to give other than the most candid Opinion and  
Advice in Matters of Law and Equity, which I  
shall at all Times study to do in such Manner, that  
you may rely thereon; and as well in the Drawing  
of Writings, as at other the Business of this Office;  
the greatest Care and Endeavour will be used to es-  
tablish the Character, and prove the Gratitude of  
Your faithful and very obedient Servant,

## MACHINE to dress FLOUR.

THE King has been pleased to grant unto JOHN MILNE of Manchester, his royal letters patent, for all his colonies in America, &c. for the sole making and vending his new invented machine, for the dressing the flour of wheat, &c. which machines are found to be of great utility by all persons who have them in use; they not only make the flour look better, but also make it use better, as they make it more lively, and will dispatch three times as much business in the same time, as the common method of bolting with cloths, and they will do that business at one operation, which, to be done with cloths, requires several, for they will dress fine flour, two seconds and three seconds, and clean the bran at one operation; or they may make two sorts, or only one sort of flour, by moving the partitions within the box, just as the person pleases who attends it; and considering their duration, are much cheaper than cloths. Also, his new invented machines for cleaning wheat, barley, &c. which takes out seeds, dust, &c. and will break and destroy must-balls, and give a brightness and lustre to the grain. The said machines are to be sold by JOHN MILNE, and Co. at their house in Manchester; or by applying to James Milne (son of the said John Milne) who is now at Mr. Nedham's, opposite Beekman's Slip, New-York.

## Just imported in the last vessels from ENGLAND, A fresh COLLECTION of the above mentioned MACHINES.

To the PUBLICK. HAVING had an experience of Mr. Milne's new invented patent machines, for bolting flour and cleaning wheat, at my mill, where they are now to be seen at work, at Long-Island—I think it my duty to declare, that they are a curious, expeditious and elegant contrivance, and what, in my opinion, will answer every purpose for which they are designed, and likewise be of great service to the publick. JACOB SEBRING, junr.

To the PUBLICK. I think it incumbent on me, for the good of the community, and particularly of those who are manufacturers of flour, to declare, that upon trial, I have found Mr. Milne's machine answer the purposes of bolting, for which they are intended; infinitely better than the old method of doing it with cloths, as they really bolt three times as quick without the least exaggeration, and are a very ingenious contrivance. Fifth-Kill, Dutchess County, July 25, 1775. DERICK BRINCKERHOFF.

## WILLIAM DEANE, Coachmaker,

INFORMS the publick in general, and his customers in particular, that he carries on his business as usual, in Broad-street, where he makes all sorts of coaches, landaus, phaetons, curricles, chairs and chaises; likewise all sorts of harness and saddlers work, as also painting, gilding and japanning in the neatest and most elegant manner.—And as he finishes all carriages whatever in his own shop, without applying to any other, he is likewise determined to make them as good, sell them as cheap, and be as expeditious as there is a possibility; and to convince the publick of the truth of what he asserts, he will make any piece of work that is required, equal to any imported from England, and will sell it at the prime cost of that imported, by which means those who are pleased to favour him with their custom will save the freight, insurance, and the expences naturally attending in putting the carriages to rights after they arrive. And as a further inducement, he will engage his work for a year after it is delivered, that is, if any part gives way or fails by fair usage, he will make it good at his own expence. Those advantages cannot be obtained on carriages imported. He has now a considerable stock of the best of all materials fit for making carriages.—For the above reasons, he most humbly requests the encouragement of the publick, which will be most gratefully acknowledged by him.

Said DEANE paints and repairs all manner of old work very reasonably; and has for sale, just finished, a new phaeton, and four new chairs.
